INDEX

to 'Electronics & Power'

Volume 14 1968

A

Abdy, C. A. *The early years of the power transformer* 335
Accounts of the IEE for 1967–68 194
Aerials, earth station, plastics bearings for 300
Air-blast circuit breakers (letters) 216, 421, 493
Allen, P. H. G. *Engineers' pay* (letter) 41
Allison, C. *Career prospects in the Civil Service* (letters) 127, 302
Aluminium and the electrical industry by B. D. Gillespie 231
Aluminium, coal and electricity 95
Amendments to IEE wiring regulations 148
Ammeter, nonmechanical d.c. 215
Amplifier, broadband, for satellite communication 258
Amplifiers, audio, high-quality by J. Dinsdale 199
Announcements to IEE members 44, 83, 128, 179, 261, 306, 345, 382, 421, 456, 498
Annual report of the IEE for 1967–68 191
Anti-Concorde lobby (letters) 490
Appliance safety 55
Apprentice projects in industry (letter) 76
Archaeologists, a new aid for 270
Arklow, P. *Support for building research* (letter) 256
Arlett, P. L. *Graduate apprenticeship schemes* (letter) 77
Art for artisans 30
Artificial intelligence, the search for by R. J. Solomonoff 8
ASEE exhibition, Earl's Court 180
Ashby, D. E. T. F. *Electric propulsion in space* 68
Askew, R. R. *Changing to metric* (letter) 339
Assessing responsible experience by P. L. Taylor and F. C. Widdis
Part 1—*The implications of bylaw* 12 375
Part 2—*The teaching profession* 401
Assessing responsible experience (letters) 448, 491
Associate membership (letter) 217
Atkinson, D. V. *Sixth-form projects* (letter) 493
Audio amplifiers, high-quality by J. Dinsdale 199
Augood, E. B. *Rolled and folded journals* (letter) 257
Automated wiring 488
Automated fault analysis for computer wiring 489
Automatic stock-preparation plant for battery factory 370
Automatic transfer-function testing of optical systems 214
Automatic underground trains in Berlin 34
Automation for machine tools 333
Automation for mine complex 332
Automation in colour printing by D. J. Kyte 101
Automation in home by M. W. Thring 440
Automation in map making by Ann Richardson 477
Automation in speech therapy 446
Automation in urban transport by T. E. Parkinson 392
Automation, the social and political implications of by Anthony Wedgwood Benn 243

B

Bailey, A. R. *Dowsing* (letter) 77
Bailey, R. W. *CEI registration cards* (letter) 128
Bailey, S. B. *Membership fees* (letter) 177
Barnes, C. C. *Top secret* (letter) 493
Baron, W. R. *Pioneer's solar-cell array* 105
Battery factory, automatic stock-preparation plant for 370
Bauldreay, J. *Engineering manpower—supply and demand* (letter) 491
Bayliss, R. H. *Rolled and folded journals* (letter) 177
BEAMA annual report 189
Beck, H. V. *Widening the IEE's scope* (letter) 340
Bedford, L. H. Faraday medallist 84
Bell, D. *Early electrical machines* (letter) 302
Bell, D. A. *Engineers' pay* (letter) 41
Bellairs, G. F. *CEI certificates* (letter) 175
Bennett, J. *Air-blast circuit breakers* (letter) 216
Bishop, K. W. J., and Spreadbury, R. J. *Static invertors: recent developments and new applications* 280
Bishop, W. M. *Economies in the rural distribution of electricity* 154
Blake, L. R. *The rise and fall of public transport systems 1066–2066* 326
Bourne, R. *Electroagriculture* (letter) 303
Bowles, C. *IEE examination results* (letter) 76
Bradbury-Williams, J. C. *Character-generation systems* (letter) 217
Brayshaw, G. S. *Mathematics and the education of electrical engineers* 235
Brewster, A. E. *A high-speed magnetic printout system* 62
Bridge, low-frequency, new 343
Britain's contribution to telecommunication by R. J. Halsey 355
Britain's national computing centre—a progress report by J. D. Humphries 141
British engineering system, a critical look by B. M. Callaway 415
British engineers in Canada (letters) 127, 175, 380
British engineers overseas (letter) 77
British industry's wasted talent (letter) 75
Broadcasting, a boost for—a review of IBC 1968 444
Brown, I. D. *Human factors in the control of road vehicles* 275
Erratum 346
Brown, Sir Stanley *Realism and idealism* 1
Buckland, R. T. *Sleep and dreams* (letter) 491
Burnett, J. M. *Plurals* (letter) 40

C

Cable plant, thyristor drives in 408
Cables, power, sodium conductor for by R. J. McAnulla 434
Cable, undersea, Italy–Spain 408
Callaway, B. M. *A critical look at the British engineering system* 415
Camera, colour, laminated coils in 445
Camera tube, new, Xray imaging with 413
Carbon atoms photographed 219
Career prospects in the Civil Service (letters) 127, 216, 302, 380
Cathode-ray-tube display systems by C. M. Cundall 115
Cathode-ray tube, improved displays with rear-port 26
CEI annual report 178
CEI certificates (letters) 175
CEI registration cards (letters) 128, 256
Chadwick, P. J. *The engineer's social responsibility* (letter) 39
Champion, C. L. *Engineers' pay* (letter) 41
Change to metric in the electrical industry, the by A. J. Gilbert 248
Changing to metric (letters) 339, 380, 420
Character-generation systems (letter) 217
Child, I. H. *The circuit-breaker story* (letter) 421
Choosing contact materials by H. W. Turner and C. Turner 437
Chopper control for electric car 301
Circuit breaker, h.v. air-blast, in the UK, early history of by W. Bevan Whitney Pt. 1, 17 Pt. 2, 365
Circuit-breaker story (letter) 493
Circuit breakers, 400kV, silenced 172
Clarke, R. L. *Women and engineering* (letter) 456
Claydon, B. J. *Peace river hydroelectric project* 397
Clayton, R. J., Biographical note 417
Coates, G. *Maximum-demand control* (letter) 339
Cockenzie power station 284
Colour facsimile transmission 174
Colour problem (letter) 419
Communication, a problem of 139
Communication—engineering for people 189
Communication—'Ham' winds of change 430
Communication, high-bandwidth, intracity 407
Components, electronic, assembling at 1500 per hour 123
Component production lines, new 301
Compton, H. K. *The stuff of dreams* (letter) 419
Computer-aided design service 124
Computer-aided Palantypist 343
Computer aids child welfare 332
Computer alarms for nuclear power stations 453
Computer-controlled store for BBC 333
Computer display systems, modular 259
Computer weather forecasting by B. J. Mason 4
Computer memories to use lasers 25
Computer message switching 122
Computer, NRDC backs low-cost 81
Computer program, new, for easier 'conversation' 174
Computer, remote plotting by 255
Computer to monitor surgery patients 215
Computers, optical store for 304
Computing centre, Britain's national—a progress report by J. D. Humphries 141
Concorde airliner, fire-protection system for 378
Consulting engineers (letter) 420
Contact materials, choosing by H. W. Turner and C. Turner 437
Control, level, for coal feeder 174
Control of road vehicles, human factors in by I. D. Brown 275
Control—theory and practice 96
Corona stabilisers, metal–ceramic 35
Crack detector, portable, using eddy-current techniques 173
Crew, E. W. *The anti-Concorde lobby* (letter) 490
Crisis in change by Crawford Robb 404
Crisis in change (letter) 490
Critical look at the British engineering system by B. M. Callaway 415
Crook, E. H. *Industrial archaeology* (letter) 125
Cult of d.c. and a.c. circuits (letters) 76, 175
Cundall, C. M. *Cathode-ray-tube display systems* 115
Current comparators—a new class of transformer-like devices by N. L. Kusters 210

D

Daniel, F. W. *Approaches to economy and productivity* 21
Data communication, national 343
Data highway, multiplexed by A. T. Keefe, G. Moss and J. R. Young 57
Data logger for resistor testing, online 33
Data service, new, Post Office 171
Data through the telephone network 391
David, E. *Josephson junctions* (letter) 419
Davies, E. J. *A slotless turbogenerator* 209
Davies, T. E. *IEE examination results* (letter) 302
D.C. test set for 1·5MV 74
Dean, K. J. *Unity for the institutions* (letter) 381
Deignan, J. P. *How about odour television?* 15
Delayed autoreclosing with electronic logic 35
Design information service for engineers 172
Design process—the birth of a new product by A. W. Lee 442
Diamonds as semiconductor heat sinks 205
Dick, A. L. *Men and motoring* (letter) 381
Dickson, J. G. *IEE membership applications* (letter) 40
Dielectric fluid, new kind of motor using 173
Digital flood-warning system 447
Dinsdale, J. *High-quality audio amplifiers* 199
Diode, faster switching with 370
Display systems, modular 259
Divide or merge? (letters) 419, 449
Dixon, E. G. *Maximum-demand control equipment* (letters) 40, 216, 420
Douglass, L. *The colour problem* (letter) 419
Dowell, T. M. *Science and human values* (letter) 177
Dowsing (letter) 77
Dreams—a functional theory by C. R. Evans 323

Dunmore, R. O. *Associate membership* (letter) 217
Dunn, A. D. *British engineers in Canada* (letters) 176, 382
· *Value engineering* (letter) 450

E

Early electrical machines (letter) 302
Early years of the power transformer by C. A. Abdy 335
Earth stations, overseas, new techniques in 124
East, A. N. *Careers in the Civil Service* (letter) 381
Economies in the rural distribution of electricity by W. M. Bishop 154
Economy and productivity, approaches to by F. W. Daniel 21
Economy, British, engineers, technologists and scientists in 294
Eddy-current process for material processing 74
Eddy-current techniques, portable crack detector using 173
Education for the engineering mission by W. G. Shepherd 157
Education, manpower and employment 429
Education of electrical engineers, mathematics and, by G. S. Brayshaw 235
Efficiency in industrial research and development by T. S. McLeod 202
Elections and transfers 45, 85, 132, 177, 221, 260, 307, 346, 382, 422, 464, 496
Electric car, chopper control for 301
Electric heating in the USA by W. K. Roots 97
Electric power in Norway by D. R. Rollo 371
Electric thermal-storage heater for plant production 446
Electrical industries of Finland 296
Electro-agriculture 189
Electroagriculture (letter) 303
Electrochemical devices by R. C. Osthoff 109
Electrochemistry—a step towards automation 315
Electroheat conference 274
Electromagnetic suspension (letter) 176
Electromagnetic suspension, new stable 74
Electronic aids for blind students 174
Electronic 'firsts' in National Giro 408
Electronic fog warning for Severn bridge 34
Electronic security aids 301
Electronic spyglass 445
Electrostatic h.v. generator, liquid-filled 219
Eliminating useless verbiage (letters) 419, 491
Elliott, P. H. *Historical articles* (letter) 421
Elsie keeps an eye on M.P.s 446
Energy system—total packaged 370
Engineer in society 56
Engineering data retrieval system 489
Engineering in the Civil Service (letter) 256
Engineering manpower (letter) 491
Engineering qualifications (letter) 491
Engineers in industry (letter) 38
Engineers' pay (letter) 41, 77, 303
Engineer's social responsibility (letter) 39
Engineers, technologists and scientists in the British economy 294
ERA heat research 56, 74
ERA—the wind of change 229
EUSEC definitions (letter) 450
Evans, C. R. *Dreams—a functional theory* 323
Exhibitions 140, 180, 190
Exports—will devaluation help? 36

F

Fault levels on supply networks 270
Feature-detection method, practical 377
Ferrybridge C opened 407
Finland, electrical industries of 296
Fire-protection system for Concorde airliner 378
Flat television tube with electrostatic deflection 120
Floodlighting St. Paul's Cathedral (letter) 39, 127
Fluidics control skin temperature 304
Flying laboratories—old and new 122
Ford, W. *Assessing responsible experience* (letter) 448
Forecasting weather by computer by B. J. Mason 4
Freeman, C. F. *Changing to metric* (letter) 339
Freeman, E. M. *Goodness factor and magnetic Reynolds number* (letter) 38
French, D. *Electromagnetic suspension* (letter) 176
Fundamental scientific research in the United Kingdom by Sir Harry Melville 27
Fuse production, photoresist technique aids 220
Fuse-testing plant, new 113
Fuses and contactors 96
Fuses, vibration tests on 174

G

Galanides, A. R. *The cult of d.c. and a.c. circuits* (letter) 176
Gamlin, J. F. *A plea for more unity* (letter) 302
· *The anti-Concorde lobby* (letter) 490
Gange, H. G. *Science and human values* (letter) 257
· *Technological credibility gaps* (letter) 380
Garratt, A. *Value: the criterion of design* 285
George, Mary. *Installations—educating the public* (letter) 40
Gilbert, A. J. *The change to metric in the electrical industry* 248
Gillespie, B. D. *Aluminium and the electrical industry* 231
Giro, National, electronic 'firsts' in 408
Glass for electronic switches 220
Glover, J. L. *Women and engineering* (letter) 380
Goldhammer, J. *New protection method for transmission towers* 374
Goodness factor and the magnetic Reynolds number (letter) 38
Graduate-apprenticeship schemes (letter) 77
Gray, J. *Homopolar machines* (letter) 340
· *Segmented rotors* (letter) 218
Griffith, E. P. *Industrial archaeology* (letter) 218
Gunn diode in video link 300
Gunn diodes, direct series connection of 413

H

Hale, H. S. *Career prospects in the Civil Service* (letter) 302
Hall, P. M. *A practical optical character-recognition system* 149
Halsey, R. J. *Britain's contribution to telecommunication* 355
Harding, J. R. *Engineers' pay* (letter) 41
Head, J. E. *Rolled and folded journals* (letter) 340
Heating, electric, in the USA by W. K. Roots 97
Helmet sights for helicopter pilots 171
Hewett, G. N. *The stuff of dreams* (letter) 419
High-bandwidth intracity communication 407
High-quality audio amplifiers by J. Dinsdale 199
High-speed magnetic printout system by A. E. Brewster 62
High-speed multipulse generator 122
High-voltage d.c.—valves or thyristors? 377
High-voltage testing laboratory 113
Higher education or practical knowhow? (letter) 75
Hill, H. *In defence of Concorde* (letter) 420
Historical articles (letter) 421
History and changing fortunes of the inductor alternator by R. K. Lay 484
Holmes, R. *Industrial archaeology* (letter) 125
Holography for microcircuit production 112
Holography, metal fatigue investigated by 494
Holttum, W. *Patents and the engineer* (letter) 449
Homopolar machines (letter) 340
Horwood, H. *The stuff of dreams* (letter) 449
'*House-style*' *concept* by D. R. Neville 482
Howton, K. D. *Support for the degree standard* (letter) 76
Human factors in the control of road vehicles by I. D. Brown 275
Erratum 346
Human perception, studies in 342
Human values, and science by J. W. E. Mitchell 2
Humphries, J. D. *Britain's national computing centre—a progress report* 141
Hunter, G. N. *The stuff of dreams* (letter) 418
h.v. d.c. conversion, advances in 342
Hydroelectric project, Peace river by J. B. Claydon 397
Hydropower, new ideas for 408

I

IEE Accounts for 1967–68 194
· Annual General Meeting, 1968 334
· Annual report for 1967–68 191
· Professional group committees, 1968–69 496
IEE examination results (letters) 76, 302, 380
IEE membership applications (letter) 40
Iliffe, D. E. L. *Mathematics and electrical engineers* (letter) 341
Impulse-generator export orders 369
Impulse generators for higher voltages 32
In defence of Concorde (letter) 420
Inductor alternator, history and changing fortunes of by R. K. Lay 484
Industrial archaeology (letters) 39, 125, 218
Industrial research and development, efficiency in by T. S. McLeod 202
Industrial units for universities 36
Industrialised buildings in Britain, electrical services in by R. Pollard 65
Industrialised building services (letter) 176
Industry—money for ideas 430
Information explosion, containing 230
Infrared and optoelectronics at the SRDE 360
Installation problems (letter) 492
Installations—educating the public (letter) 40
Integrated circuits interconnected with gold crossovers 215
Integrated microwave oscillator 26
Inventions, ingenious, from budding engineers 254
Invertors, static, recent developments and new applications by K. W. J. Bishop and R. J. S. Spreadbury 280
Irons, R. G. *Men and motoring* (letter) 381
Isaac Newton telescope 36
Is talent really wasted? (letter) 216

J

Jackson, F. *Industrial archaeology* (letter) 125
Jackson, G. A. *Phase-control thyristor circuits* (letter) 41
Jeremiah, M. G. *Career prospects in the Civil Service* (letter) 216
Jockel, L. M. *Industrial archaeology* (letter) 218
Johns, A. T. Power-system logic 12
Johnson, A. C. R. *Moisture measurement in glass-making* (letter) 126
Johnson, F. H. *Eliminating useless verbiage* (letter) 419
Jones, I. B. L. *Photoresists in fuse production* (letter) 339
Jones, M. J. B. *Metrication* (letter) 420
Josephson junctions—all-purpose components of the future? by L. Solymar 316
Josephson junctions (letter) 419

K

Kanthaswamy, V. *IEE examination results* (letter) 380
Keefe, A. T., Moss, G., and Young, I. R. *A multiplexed data highway* 57
Kestrel's electrical systems 123
Kusters, N. L. *Current comparators—a new class of transformer-like devices* 210
Kyte, D. J. *Automation in colour printing* 101

L

Laithwaite, E. R. *Shaded poles in unusual electric motors* 206
Langridge, F. R. J. *Apprentice projects in industry* (letter) 76
Lane, F. J. *Biographical note* 417
Laser, CO_2, communication 305
Laser, i.r., green harmonics from 305
Laser, portable, for undersea use 122
Laser, y.a.g., high-efficiency 414
Laser-coded tape recording 164
Laser-communication method, improved 80
Laser-frequency check, highest 164
Laser-guided tunnelling 408
Lasers, computer memories to use 25
Laver, F. J. M. *Stimulus or constraint?—the interplay of computer design and use* 361
Lawson, D. W. *Higher education or practical know-how?* (letter) 75
Lay, R. K. *History and changing fortunes of the inductor alternator* 484
Lead power 96
Learning to live with the computer 471
Lee, A. W. *The design process—the birth of a new product* 442
Light detection, undersea, for plankton studies 447
Lindsay, P. A. *Why quantum mechanics?* 290
Linear motor in crash-test rig 213
Linley, B. D. *Assessing responsible experience* (letter) 448
Locke, R. A. *Assessing responsible experience* (letter) 491
Logic circuits, new low-power 447
Logic, delayed autoreclosing with electronic 35
Logic, power-system by A. T. Johns 12
London Electrical Engineers, the by R. H. Smith 239
London Electrical Engineers (letter) 493
Longhorn, J. H. *Installation problems* (letter) 492
Longley, D. *The cult of d.c. and a.c. circuits* (letter) 176

Lord Jackson of Burnley. Honorary Fellow 84
Lythall, R. T. *The circuit-breaker story* (letter) 421

M

McAnulla, R. J. *Sodium conductors for power cables* 434
McDowell, A. *Patents and the engineer* (letter) 449
McLeod, T. S. *Efficiency in industrial research and development* 202
Machine tools, automation for 333
Magnetic modulator, optical communication with 163
Magnet, giant beam-bending 489
Magnetic printout system, high speed by A. E. Brewster 62
Magnetic storage, high-density 377
Magnetohydrodynamics, advances in closed-cycle 112
Magnets for miniature d.c. motors 369
Mailing of journals (letter) 493
Management, marketing, statistical methods in by L. A. Williams 319
Manpower and management (letter) 451
Marconi and Preece (letter) 492
Mason, B. J. *Forecasting weather by computer* 4
Mathematics and the education of electrical engineers by G. S. Brayshaw 235
Mathematics and electrical engineers (letter) 341
Maximum-demand control equipment (letters) 40, 126, 216, 339, 420
Mayes, V. M. *School physics* (letter) 218
Medicine—the dangers of modern electronics 315
Meek, J. M., Profile 416
Meek, J. M. *The vital spark* 431
Melville, H. *Fundamental scientific research in the United Kingdom* 27
Membership fees (letter) 177
Memories, glass, find wide application 259
Memory system, weather satellite 26
Men and motoring (letter) 381
Menzies, M., and Smith, W. A. L. *Science-teaching crisis* (letter) 76
Metric, the change to, in the electrical industry by A. J. Gilbert 248
Metrication 95, 230
Microcircuit factory, new 341
Microcircuit production, holography for 112
Microcircuit techniques, new 163
Microcircuits by the million 214
Microcircuits, denser 304
Microelectronic Doppler navigation system 452
Microelectronics, a programme for 315
Microelectronics, Bosworth courses for 190
Microelectronic filters 213
Microelectronics—growth in miniature 190
Microwave communication in tunnels 471
Microwave oscillator, integrated 26
Microwave unit aids glassmaking 34
Microwaves, drilling diamonds by 414
Midgley, D. *Referee anonymous* (letter) 381
Milne, D. M. *British engineers in Canada* (letter) 127
Mine complex, automation for 332
Minter, R W. *Trained and untrained electricians* (letter) 77
Mitchell, J. W. E. *Science and human values* 2
· *Science and human values* (letter) 340
Model building—a technique for modern management by P. J. Norris 472
Moisture measurement in glassmaking (letter) 126
Morgan, J. H. *Mailing of journals* (letter) 493
Morgan, W. C. *Metrication* (letter) 420
Moss, G., Young, I. R., and Keefe, A. T. See Keefe, A. T.
Motor, new kind of, using dielectric fluid 173
Motors, electric, unusual, shaded poles in by E. R. Laithwaite 206
Motors, reluctance, new-style 413
Munro, H. *The crisis in change* (letter) 490
Myerson, R. J. W. *Installations—educating the public* (letter) 40

N

Neville, D. R. *The 'house-style' concept* 482
New microcircuit techniques 163
New Post Office data service 171
New products 47, 87, 133, 183, 223, 262, 308, 347, 384, 423, 465, 499
New protection method for transmission towers by J. Goldhammer 374
Norris, P. J. *Model building—a technique for modern management* 472
Norway, electric power in by D. R. Rollo 371
Nuclear power—is Britain slipping? 270
Nuclear power—reorganisation of the nuclear industry 430
Nuclear power stations, computer alarms for 453
Nutting, D. C. *EUSEC definitions* (letter) 450

O

Obituary 43, 83, 131, 179, 222, 261, 306, 345, 383, 421, 456, 498
Odour television by J. P. Deignan 15
Officers of the IEE 129, 198, 457
Olken, H. *The technology drag* (letter) 451
Optical character-recognition system, practical by P. M. Hall 149
Optical communication with magnetic modulator 163
Optical-display system, cold-cathode 220
Optical guidance for pipe-laying machine 378
Optical store for computers 304
Optical systems, automatic transfer-function testing of 214
Optoelectronic device, new 258
Optoelectronics, and infrared, at the SRDE 360
Organic semiconductors by R. Pethig 271
Origin of the air-blast circuit breaker (letter) 126
Osthoff, R. C. *Electrochemical devices* 109
Owen, K. E. *Engineering qualifications* (letter) 491

P

Packing material, new, safe transit with 171
Parkinson, T. E. *Automation in urban transport* 392
Parr, F. E. *Engineers' pay* (letter) 77
Patents and the engineer 358
Patents and the engineer (letter) 449
Patterns, looking for 353
Peace river hydroelectric project by J. B. Claydon 397
Pelly, D. H. H. R. *Consulting engineers* (letter) 420
Pethig, R. Organic semiconductors 271
Phase-control thyristor circuits (letter) 41
Photographing electromagnetic fields 113
Photoresists in fuse production (letter) 339
Photoresist technique aids fuse production 220
Physics for the engineer 140
Pioneer's solar-cell array by W. R. Baron 105
Plasma for better rail adhesion 220
Plastics bearings for earth-station aerials 300
Plating solids, new method for 305
Plea for more unity (letter) 302
Plummer, D. *Manpower and management* (letter) 451
Plurals (letter) 40
Pocock, R. F. *Marconi and Preece* (letter) 492
Pollard, R. *Electrical services in industrialised buildings in Britain* 65
Potok, M. H. N. *Divide or merge* (letter) 449
Power-system logic by A. T. Johns 12
Power systems, low-cost data display for 488
Practical optical character-recognition system by P. M. Hall 149
Prediction from the past 471
President of the IEE, 1968–69 416
Printed-circuit boards, direct production of 489
Printed circuits, developments in 453
Printing, colour, automation in by D. J. Kyte 101
Productivity and economy, approaches to by F. W. Daniel 21
Propulsion in space, electric by D. E. T. F. Ashby 68
Publications—rolled, folded or flat? 353
Pulse-code modulation, developments in 163
Pulse-code modulation goes commercial 37
Pulse-code modulation, Post Office tests on 370

R

Radar-beam rotation, fast 360° electronic 25
Radar, high-power surveillance 445
Radio interference, checking 37
Radar, new, for marine collision avoidance 369
Radar, new transportable 301
Radio, intertrain, for Victoria line 123
Radiometer for US weather satellite 164
Raju, Govinda, G. R. *Referee anonymous* (letter) 256
Ramsden, D. W. *Engineers' pay* (letter) 303
Rare earths, increased production of 488
A raw deal for technician engineers? (letter) 75
Rawll, R. H. *Floodlighting St Paul's Cathedral* (letter) 39
· *The London Electrical Engineers* (letter) 493
Realism and idealism by Sir Stanley Brown 1
Redmond, J. *Technological credibility gaps* (letter) 380
Reed switch for power applications 81
Referee anonymous (letters) 256, 380
Remote plotting by computer 255
Research and development, industrial, efficiency in, by T. S. McLeod 202
Research in the United Kingdom, fundamental scientific by H. Melville 27
Research—new views on semiconductor research 429
Research—who pays for what? 391
Rice, M. R. *Engineering in the Civil Service* (letter) 256
Richardson, Ann. *Automation in map making* 477
Ring, E. H. *Industrialised-building services* (letter) 176
Ripple control system, solid state 304
Rise and fall of public transport systems 1066–2066 by L. R. Blake 326
Road accidents (letter) 451
Road vehicles, human factors in the control of by I. D. Brown 275
Robb, Crawford. *The crisis in change* 404
Roberts, L. C. *Industrial archaeology* (letter) 218
Rolfe, J. M. *British industry's wasted talent* (letter) 75
Robot put through its paces 300
Rolled and folded journals (letters) 77, 177, 257, 340
Rollo, D. R. *Electric power in Norway* 371
Roots, W. K. *Electric heating in the USA* 97
Roscoe, A. W. *The colour problem* (letter) 419
Rural distribution of electricity, economies in by W. M. Bishop 154

S

Safety scheme for new plant 124
Satellite communication, broadband amplifier for 258
Satellite to aid Apollo space programme 71
Satellite, US weather, radiometer for 164
Satellite, weather, memory system 26
Saunders, M. W. *The stuff of dreams* (letter) 418
Scaife, F. N. *Changing to metric* (letter) 381
Scholar, H. I. *CEI certificates* (letter) 175
· *Rolled and folded journals* (letter) 340
School physics by J. W. Warren 73
School physics (letter) 218
Science and human values by J. W. E. Mitchell 2
Science and human values (letters) 177, 257, 340
Science-teaching crisis (letter) 76
Scratch-free finishes for silicon slices 164
Segmented rotors (letter) 218
Semiconductor heat sinks, diamonds as 205
Semiconductor manufacture, diversity in 332
Semiconductors, organic by R. Pethig 271
Shaded poles in unusual electric motors by E. R. Laithwaite 206
Shepherd, W. G. *Education for the engineering mission* 157
Silicon slices, scratch-free finishes for 164
Sim, A. C. *The cult of d.c. and a.c. circuits* (letter) 76
Simpson, P. G. *Engineers in industry* (letter) 38
Simulator, d.c., for a.c. systems 259
Sixth-form projects (letter) 493
Sleep and dreams (letter) 491
Smith, A. G. *Floodlighting St. Paul's Cathedral* (letter) 127
Smith, B. Samwell. *Mathematics and electrical engineers* (letter) 341
Smith, R. H. *The London Electrical Engineers* 239
Smith, W. A. L., and Menzies, M. *Science-teaching crisis* (letter) 76
Social and political implications of automation, the by Anthony Wedgwood Benn 243
Sodium conductors for power cables by R. J. McAnulla 434
Soldering, drag, for printed-circuit boards 35
Soldering, r.f., for computers 343
Solid-state ripple control system 304
Solomonoff, R. J. *The search for artificial intelligence* 8
Solymar, L. *Josephson junctions—all-purpose components of the future?* 316
Sound-spectrograph applications 305
Soughan, D. W. *British engineers overseas* (letter) 77
Specialise or generalise? 391
Spectrometer, miniature, for space probes 25
Spreadbury, R. J., and Bishop, K. W. J. See Bishop
Standardisation, BSI structure changes 55
Static compensator for Zambia 35
Static invertors; recent developments and new applications by K. W. J. Bishop and R. J. Spreadbury 280
Statistical methods in marketing management by L. A. Williams 319
Status and the institutions (letter) 175
Staunton, A. J. *Road accidents* (letter) 451
Stimulus or constraint? the interplay of computer design and use by F. J. M. Laver 361
Strong, N. G. *Eliminating useless verbiage* (letter) 491
Street lighting, high-contrast diagonal-emission 254

The stuff of dreams (letters) 418, 449
Stuttard, B. *V.L.F. Machine oscillators* (letter) 303
Substation, 33kV, factory-built 213
Sud, Y. D. *Rolled and folded journals* (letter) 77
Superconducting motor 95, 114
Superconducting quadrupole magnet 113
Support for building research (letter) 256
Support for the degree standard (letter) 76
Surface charge and sputtering at the ERA, research on 452
Switch, new, fast-closing 494
Switches, electronic, glass for 220
Switching fluids electrically 414

T

Tape recording, laser-coded 164
Taylor, P. L., and Widdis, F. C. *Assessing responsible experience*
Part 1—the implications of bylaw 12 375
Part 2—the teaching profession 401
Teaching aids, electronic books as 79
Technical publications 78, 111, 153, 222, 257, 306, 375, 400, 483
Technological credibility gaps (letters) 380
Technology drag (letter) 451
Technology's credibility gap 269
Telecommunication, Britain's contribution to by R. J. Halsey 355
Telecommunication, world, a plan for 229
Telephone exchange, crossbar, first in operation in the UK 447
Telephony at sea, better 269
Television, colour, clarifying 333
Television, colour, new tube 378
Television system, complete closed-circuit 80
Television, tubeless, uses array of light bulbs 258
Television tube, flat, with electrostatic deflection 120
Television tubes, large-scale production of 255
Thermionic generator for space 414
Thick films, progress in 338
Thomas, H. A. *Divide or merge?* (letter) 419
Thring, M. W. *Automation in the home* 440
Thyristor control for elongator-mill drive 14
Thyristor convertor for h.v. d.c. transmission 214
Thyristor drives for paper-coating line 79
Thyristor drives in cable plant 408
Top secret (letter) 493
Traffic-control developments 34
Trained and untrained electricians (letter) 77
Transformer for Dounreay, site-assembled 81
Transformer, power, early years of by C. A. Abdy 335
Transformer-test plant rebuilt after fire 33
Transistors, thin-film, paper 414
Transmission towers, new protection method for by J. Goldhammer 374
Transport for power 140
Transport systems, public, 1066–2066 by L. R. Blake 326
Transport, urban, automation in by T. E. Parkinson 392
Turbines, giant 80
Turbogenerator, slotless by E. J. Davies 209
Turner, H. W., and Turner, C. *Choosing contact materials* 437

U

Unity for the institutions (letter) 381
Upton, R. W. *Maximum-demand control equipment* (letter) 126

V

Value engineering (letter) 450
Value: the criterion of design by A. Garratt 285
Vassilissin, A. N. *Industrial archaeology* (letter) 39
Vickers, J. S. *Changing to metric* (letter) 339
Vidicon, all-electrostatic 219
Vidicons watch level crossings in Italy 489
Videotape copying, high-speed 378
Vincent, P. W. *Is talent really wasted?* (letter) 216
Vital spark by J. M. Meek 431
V.L.F. machine oscillators (letter) 217, 303

W

Wafer, R. V. *A raw deal for technician engineers* (letter) 75
Wales, W. A. *IEE examination results* 76
Walker, W. G. *Manpower and management* (letter) 451
Wallace, N. G. *The stuff of dreams* (letter) 419
Ward Leonard drives—75 years of development by K. A. Yeomans 144
Warren, J. W. *School physics* 73
Water-cooled generator rotor 121
Websper, F. D. *CEI registration* (letter) 256
Wedgwood Benn, Anthony. *The social and political implications of automation* 243
West, E. L. *Early electrical machines* (letter) 302
Westcott, J. H. *Biographical note* 417
Weston, M. *Industrial archaeology* (letter) 125
What's in a name? 403
Whitney, W. Bevan. *The early history of the h.v. air-blast circuit breaker in the UK*
Pt. 1 17
Pt. 2 365
· *The circuit-breaker story* (letter) 493
Why quantum mechanics? by P. A. Lindsay 290
Widdis, F. C., and Taylor, P. L. (See Taylor)
Widening the IEE's scope (letter) 340
Williams, L. A. *Statistical methods in marketing management* 319
Williams, T. *V.L.F. machine oscillators* (letter) 217
Wiring regulations, IEE, amendments to 148
Women and engineering (letter) 380, 456
Wood, B. *Origin of the air-blast circuit breaker* (letter) 126
Wood, I. *A happy divorce?* (letter) 257
Woodcock, F. J. *The engineer's social responsibility* (letter) 39
Wristwatch, high-precision, quartz 172

X

Xray imaging with new camera tube 413

Y

Yeomans, K. A. *Status and the Institutions* (letter) 175
· *Ward Leonard drives—75 years of development* 144
Young, I. R., Keefe, A. T., and Moss, G. See Keefe, A. T.

Z

Zinc-air battery available 255

Some recent books

· Almazov, A. B. *Electronic properties of semiconducting solid solutions* 455
· Alston, L. L. (*editor*) *High-voltage technology* 411
